

HUMMINGBIRD

1.

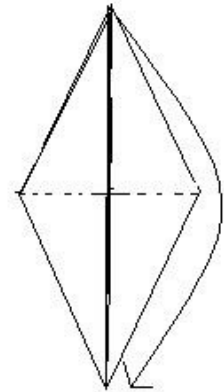

Preliminary fold

2.

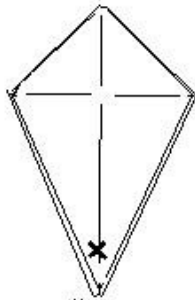

Petal fold
Repeat behind

3.

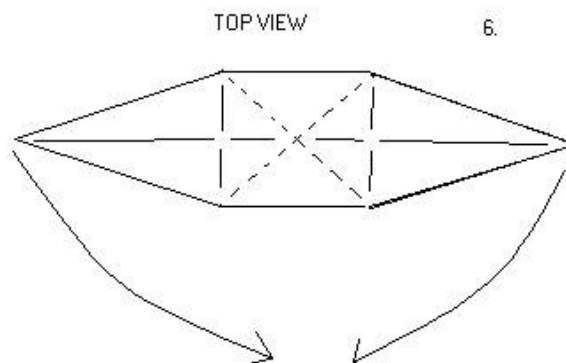

Valley fold the point back
down to form the bird base
Repeat behind

4.

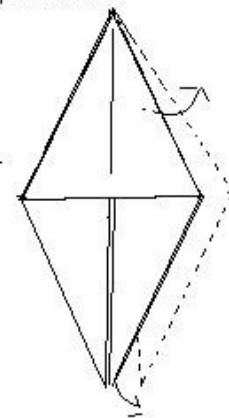

Hold the front flap by the "X"
and repeat behind.
Pull the flaps away from each
other stretching out the central
triangle. This forms what is
called the stretched bird base.

5.

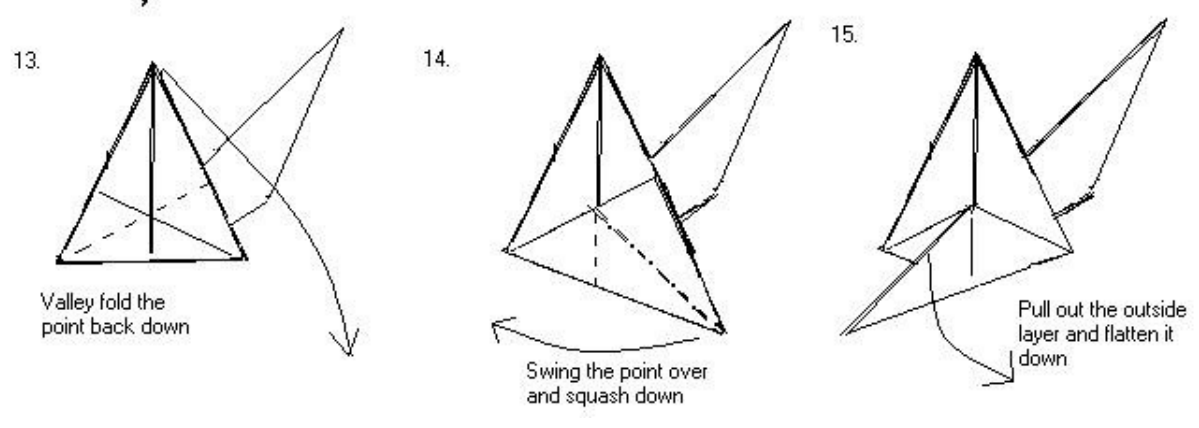

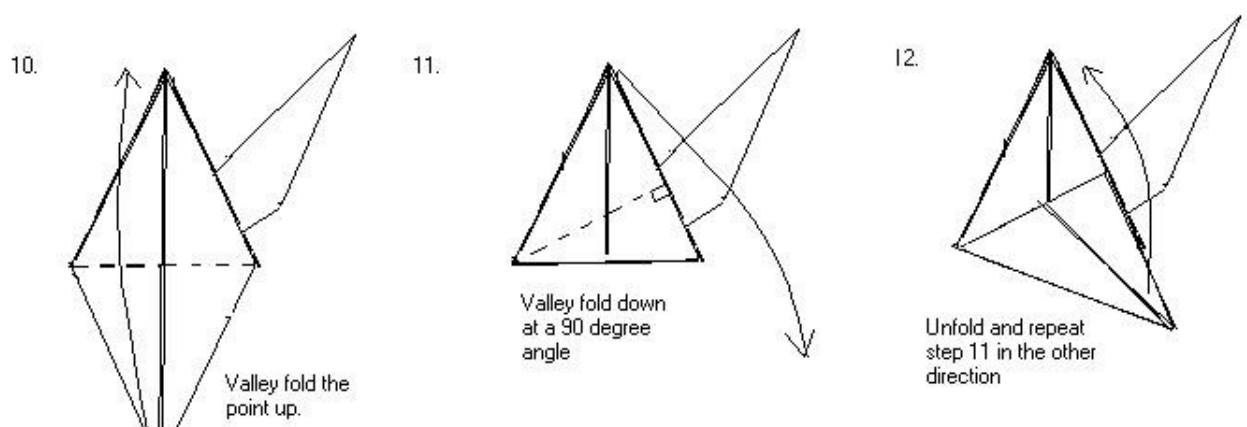

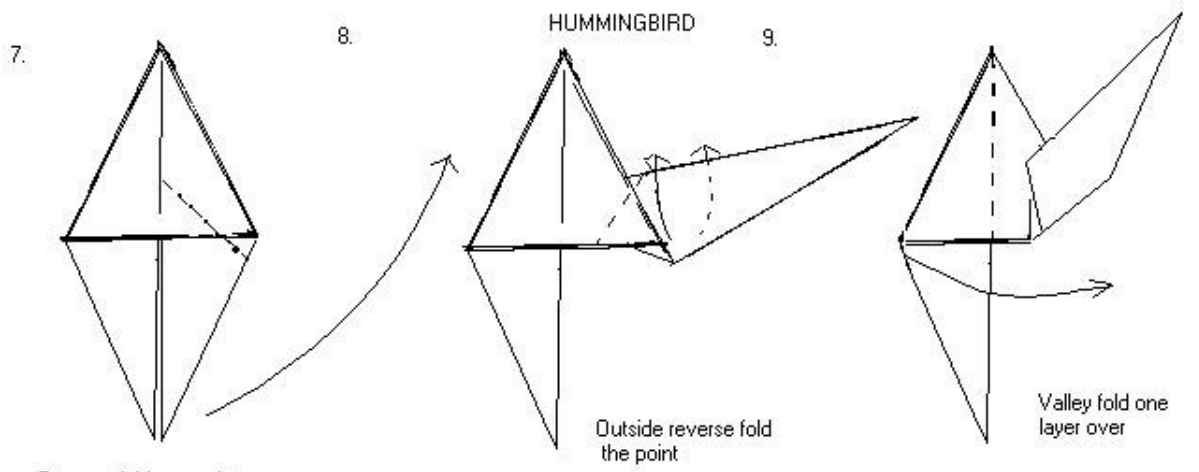

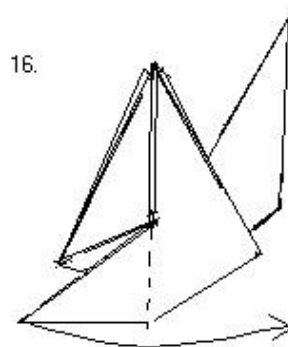

Reverse fold the 2 side points
down to reform a bird base
shape with different internal
layering

6.

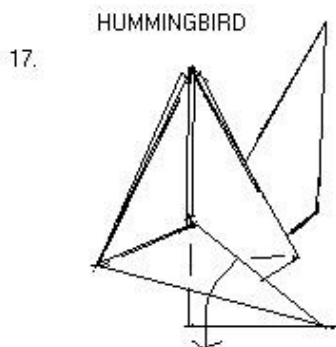

Stretch the paper out to fill in
the dotted lined area and widen
the triangle on top. This moves
the point on the right slightly
off center
Repeat behind
Skip this step if you
like.

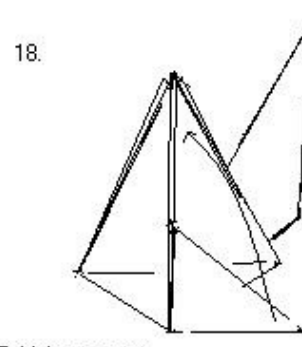

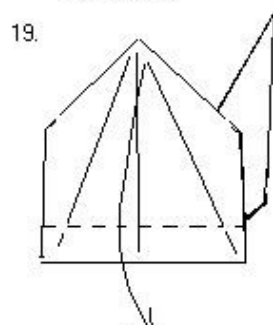

Valley fold the triangle over

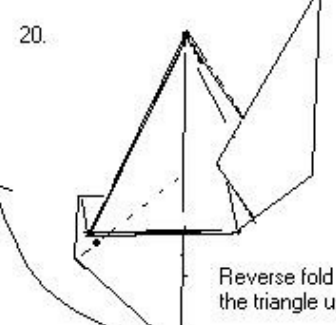

Pull out the paper on this side

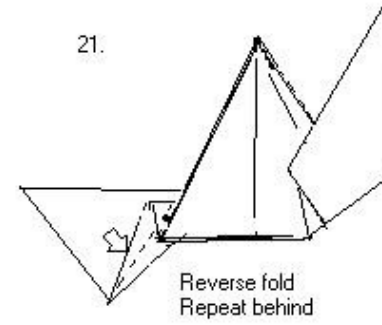

Fold the paper up while spreading it out

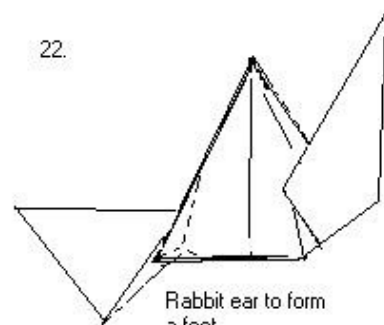

Valley fold the flap down

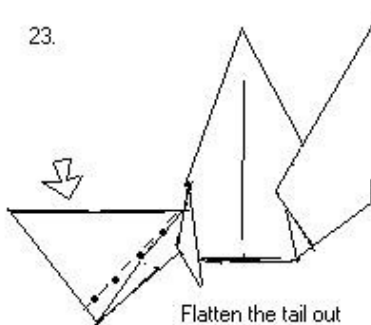

Reverse fold the triangle up

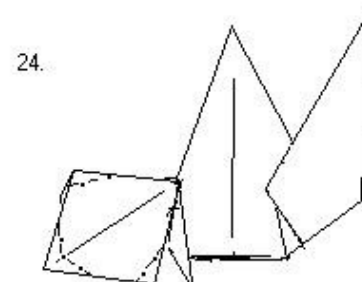

Reverse fold Repeat behind

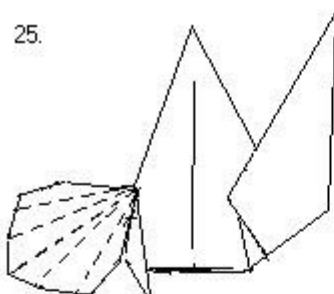

Rabbit ear to form a foot Repeat behind

Flatten the tail out into a square shape

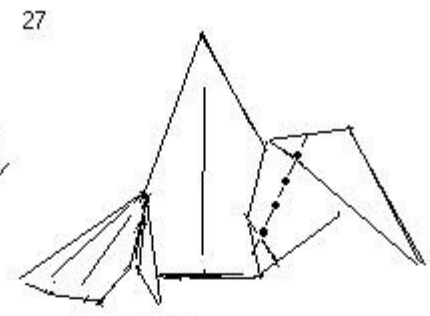

This is the tail turned to the side Round off the tail with mountain folds

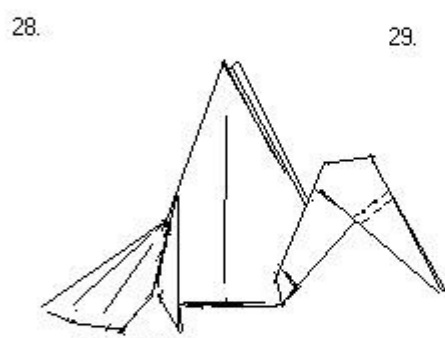

Make these folds
and unfold to
make fan-type
creases. Curl the
tail around

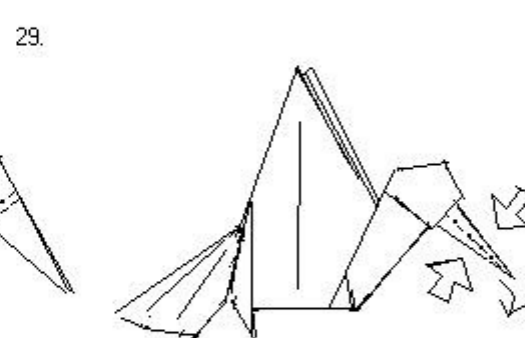

Outside reverse
fold the head
down

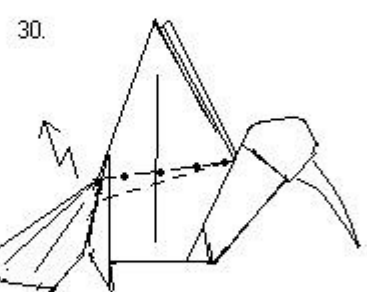

Mountain fold
Repeat behind

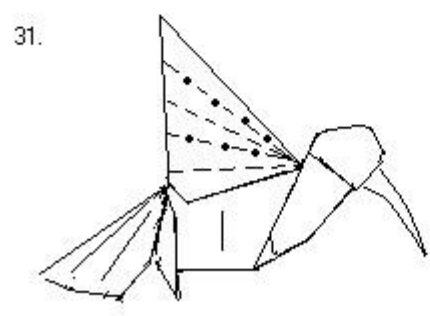

Crimp fold to
form the beak

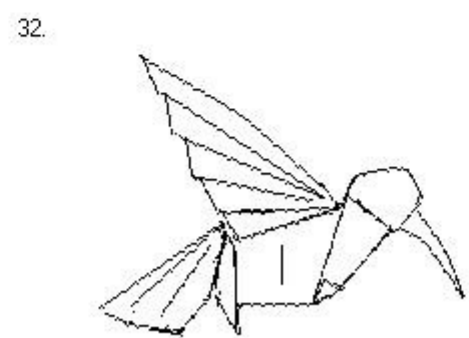

Pinch the beak
and curve it

Pleat the wing
repeat behind

Fold the wing
like a fan and
unfold
Repeat behind
